

ULTIMA RADIO

With a mixture of a variety of genres such as Psychedelic, Progressive, Stoner, New Age and Nu-Metal, Ultima Radio constitute a link between the icons of Woodstock and the idols of their own generation in order to shape their individual sound. This is now planned to be demonstrated on their first LP called "Mind Echoes".

"Stoner-Rock fans will listen with great attention to this young band from Graz"

(Christina Fuchs, FM4)

"Above all the Stoner Rock fabricated by Ultima Radio, hovers and oozes a spacy soup from hot Funk, atmospheric electronic effects and warm psychedelic."

(stonerrock.eu)

"Ultima radio deliver an acoustic appetizer"

(Michael Walzl, stormbringer.at)

The five members, all from Graz, got together in 2014 and after a short creative period they released their first, self-titled EP in the following year. The EP was very well received by international blogs (stonerrock.eu, stormbringer.at, etc.) as well as the Austrian media (Radio FM4, redbull.at, Radio Soundportal, Kleine Zeitung, etc.). In the spring of 2016, the split single appeared together with the Austrian Band "Witchrider", as well as a split single with the Carinthian band "Colors Of Monochrome".

"Ultima Radio combines Stoner Rock, massive guitars and a booming bass with the flashy voice of singer Zdravko Konrad"

(Laura Ritter, music-news.at)

"Ultima Radio - bizarre, experimental and powerful"

(Ronny Priesching, paradox)
